“I loved the games, I could feel my heart racing!”

Market simulation game

After learning about the types of investments, you will experience the rollercoaster ride of investing - but with no consequences!

- 1 Start with £1,000 in play notes
- 2 Choose an investment type for each year
- 3 Discover how you performed that year
- 4 Collect your winnings / return your losses

Uses 6 years of real-life investing data

“There was a really positive atmosphere in the room, everyone was smiling!”

Preview some slides

Here are just a few of my 150 slides from the course. I always aim to use colour and layout to make things as clear and simple as possible.

A Beginner's Guide to Investing

Session 1:
Types of investment and managing risk

by Leo Dennis

Before we begin...

Please ask questions at any point – there is no such thing as a silly question

The  slides will be sent out as a pdf after the course

ESG (ethical) Investing

Environmental, **Social** and **Governance** Investing considers how companies behave, not just how much money they make.

Climate change
Carbon emissions
Renewable energy

Working conditions
Diversity and inclusion
Impact on community

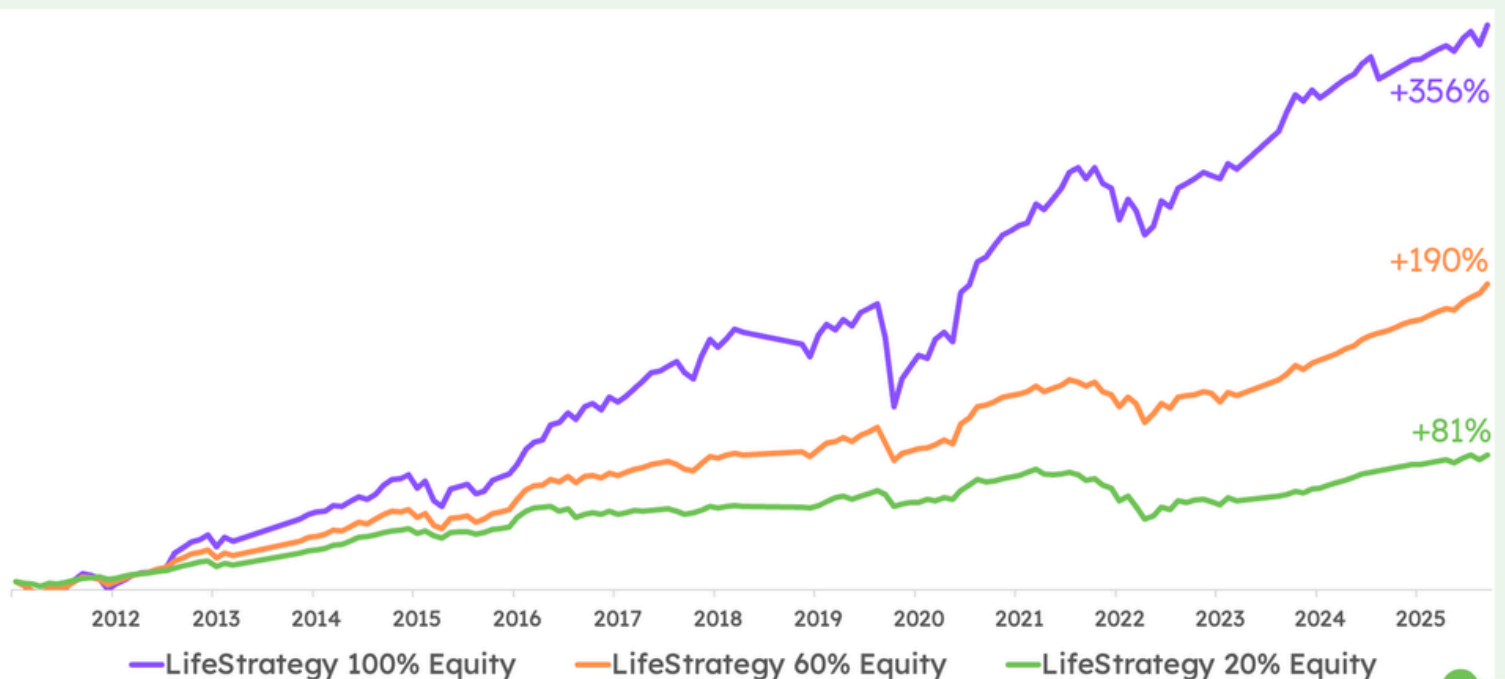

Board leadership
Executive pay
Transparency

Please be aware:

- ESG funds can still vary a lot in what they include
- Different providers define ESG differently
- ESG doesn't guarantee higher (or lower) returns

NEW

Really enjoyable and fairly priced experience.

As someone who knew nothing absolutely nothing about finance or investing beforehand, this was the perfect introduction course for someone like me!

Leo is friendly and always available to talk about the course even beyond the sessions. The sessions are engaging and fun with jargon free slides and interactive games.

Leo is a wonderful teacher! He really didn't mind me asking any of my silly questions and has massively boosted my confidence going forward! I am so pleased to not only have his support within the class room but also moving forward ! I would 100% recommend this course ! Thanks Leo!

I had a great time doing Leo's investment course. I found it really engaging and clear to understand. I was very cautious and scared about the idea of investing going into this as it was so unknown to me, but now I feel I understand much more and feel more confident in understanding the risks and how to know what's right for me. I can't fault the course and am really grateful for Leo delivering this - thank you!

I was interested in investing anyway and have dabbled slightly, however I didn't feel in a particularly informed position to be able to make accurate decisions. In adult life, I've found I have enough about me to comprehend the basics of investing, but not the time to look into it properly, so having a course with an actual human who completely understands the world of investing, and being able to ask questions there and then, has been amazing to help me understand and build my confidence in the world of investing. Thank you.

Investing is something I have done through moneybox for a short time, however it's not something I really understood. However, from doing this course it has helped clear things up a lot more. I have a better understanding of what my money is doing and how I can get more out of it. It was really interesting understanding about my own investment profile and the type of risk's I would be willing to take. I'm not great with sitting in long meetings and taking in lot's of information, however Leo made this much easier through keeping information simple and using games to keep me actively engaged. I would highly recommend this course to anyone, as it was simply brilliant.
